## About RollerBed

The Roller Bed is part of a new range of space conscious furniture products from Deep Surface. Essentially this is a supportive yet comfortable single bed that can be rolled away when not needed. When closed the Roller Bed becomes a multi-purpose piece of furniture that can be used as a seat, foot stool or coffee table and which also provides storage space for bedding and more besides.

## Integrating RollerBed

The Roller Bed is available in a range of premium materials and finishes to complement every interior space. Fine veneers, laminates and resin finishes are available for the bed sides with leather, natural and synthetic fabrics being available for the upholstery.

Should customers require a perfect match with a specific interior, custom finishes can be produced using fabrics and materials supplied by the customer, every combination to suit every interior and every budget.

## Installation & use

In operation the Roller Bed is simplicity itself. Instead of unfolding a heavy and awkward piece of furniture as with most temporary beds, the owner merely needs to pull on the handle and the bed rolls out.

As soon as the bed begins to unroll the legs are easily released taking all the weight of the bed and lock into position leaving the owner with a safe and sturdy place to sleep.

## About Deep Surface

Deep Surface Ltd. began as the result of work undertaken at London based Royal College of Art. The concept is simple; produce temporary use furniture that can be simply deployed in seconds without the need for complex user operation.

The first product to stem from this philosophy is the Roller Bed, a temporary bed that can be deployed with a gesture and is the first zero-space product from Deep Surface. The prototype for this first product received considerable press attention, being featured in a wide range of contemporary media including television, printed press and radio shows.

The Roller Bed is now complete and available from Deep Surface stockists. We are proud to offer an increasing line of products to fulfil this zero-space furniture philosophy and is using the very best of British manufacture in the production of its products.

## Key Benefits

Multi-use piece of attractive and high-quality furniture

Integrated storage for genuine stand-alone practicality.

elegant yet high-strength design

Endlessly customisable to fit in with any interiors scheme, now and in the future

## Package Volumes

(w x d x h in mm)

### RollerBed

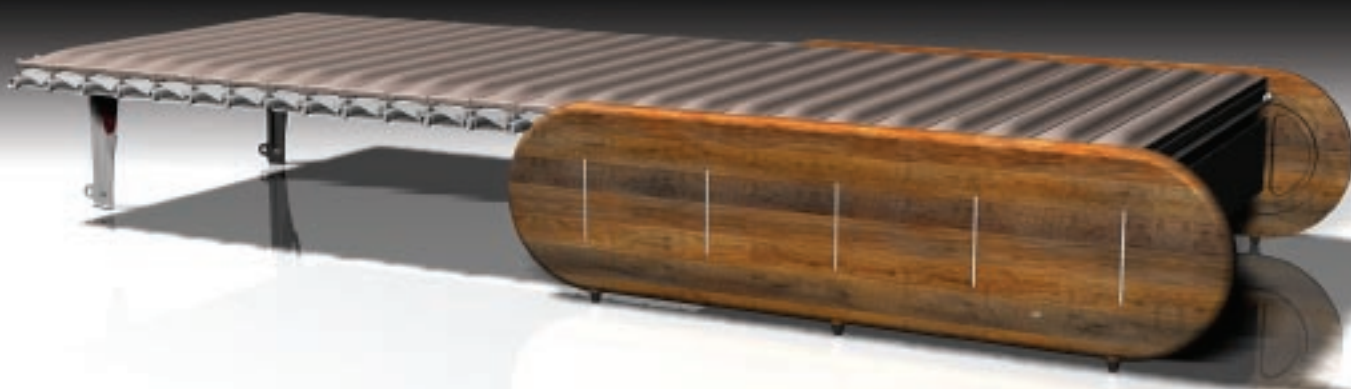

Closed 885 x 1110 x 310

Open 885 x 2010 x 310

### Sleeping Area

820x 2000

## By Request

The innovative and versatile design of the slat system used by our roller products lends itself to a great range of bespoke applications. We are always interested in new projects, why not get in touch and see how we can help make your ideas take form?

## Package Volumes

Slats can be produced to any reasonable length with only final weight being the limitation. The profile dimensions are:

30mm in height (plus surface finish)

80mm in width (from rotation centres)

## Roll-Away Table

Also under development at Deep Surface is the Roller Table. This takes the simplicity of the bed slat construction and uses it to produce stable, flat surfaces of sizes up to an eight-person dining table.

Just as with the Roller Bed this is a high quality, large item of furniture that can be deployed and retracted easily, but that does not give the impression of being a 'fold away, hide away' temporary structure.

And again, just as with the roller bed, the table surface can be ordered with the standard, durable cherry veneered surface or with a bespoke finish to harmonize with its surroundings.

Laminates, glass, printed plastics, metals or woods will all give a unique and bespoke feeling to what is a very formal piece of furniture.
